요약문: Trees in a city are important not only for their (A)_____ but also for making city life more (B)_____.

When people think of trees in a city, they usually think of how beautiful the trees make the streets look. But trees do much more than that. On hot summer days, the shade of large trees keeps streets and buildings cooler, so people use less electricity for air conditioning. Trees also catch dust from the air with their leaves, which helps people breathe cleaner air. In addition, many people say that they feel calmer when they walk along streets with trees. For these reasons, some cities plant more trees every year. A tree is not just a decoration; it is a quiet helper that makes city life healthier and more comfortable.

☐ appearance … pleasant ☐ appearance … expensive

☐ electricity … pleasant ☐ shade … noisy
